

TORQUE ANGLE GAUGE

TORQUE ANGLE GAUGE

NEW

TWO MODELS AVAILABLE

CDI PART # TA-4 3/4" DR.

CDI PART # TA-3 1/2" DR.

Fasteners that need to be installed may have manufacturers' specifications stated that require a pre-load torque value applied plus an angle turn.

CDI's Torque Angle Gauges can do this and more...they feature:

- Large, easy to read degree increments.
- 360° Angle scale marked in 2° increments.
- Can be used with standard socket sets 1/2" or 3/4".
- Adjustment arm keeps angle scale stationary.
- Supplied is a multi positional reaction arm for additional flexibility.

... It's the Torque + Angle Method...

CDI WARRANTY POLICY

All Consolidated Devices Incorporated manufactured products are warranted for a period of one year from the date of purchase against defects in materials and workmanship. CDI will repair or replace, at their discretion, any CDI manufactured product returned to their place of business, postage or freight prepaid, and accompanied with a dated copy of the sales receipt or purchase order. Products not manufactured by CDI will be warranted by the manufacturer of the product and their warranty will apply.
